Summary

Computer Science student with strong skills in C, Java, and JavaScript, and experience in fronted development using React. Built projects including a ATM Simulator System and an AI-based Object Monitoring System, with a solid foundation in core CS concepts.

Education

Bachelor of Technology (CSE-IOT)

GNIOT, UP

Graduated: 2026

CGPA: 8 / 10

Intermediate

Gaya College, Bihar

2021

Percentage: 71

High School

SRH High School, Bihar

2019

Percentage: 78

Projects

AI-Based Object Monitoring System | IOT , Computer Vision

Oct 2025 – Dec 2025

- **Built an AI-powered object detection** and monitoring system using computer vision techniques.
- Implemented real-time object detection and alert mechanism for security monitoring.
- Integrated hardware module (ESP32-CAM) for live video streaming and remote access.
- Improved monitoring efficiency by enabling automated real-time object detection.

ATM Simulator System | Java , MySQL

Jan 2026 – Feb 2026

- Implemented a desktop-based Bank Management System using Java Swing and MySQL to manage customer accounts and transactions.
- Implemented core features such as account creation, deposit, withdrawal, balance enquiry, and mini statement.
- Integrated JDBC for seamless connectivity between the Java application and MySQL database.
- Designed multiple user interfaces including login authentication, signup forms, and transaction modules.

Skills

Programming Languages: C, Java, JavaScript

Frontend Technologies: HTML, CSS, Tailwind CSS, React

Databases: MySQL

Tools Platforms: GitHub, VS Code

Core Concepts: OOPs, DBMS, OS, CN

Awards & Certifications

- **NPTEL Cloud Computing – IIT Kharagpur (2025):** Topics: Virtualization, Cloud Architecture, IaaS, PaaS, SaaS, Security.
- **Full Stack Web development - IIT Kanpur (2025):** Technologies : HTML, CSS, JavaScript, React, Spring Boot, MySQL.
- **Academic Excellence Award – GNIOT (2025):** Awarded for outstanding academic performance in the department.
